**JOIN A WINNING TRADITION  
WITH BREVANT® SEEDS.**

## **PARTICIPATE IN THE 2022 WORLD FORAGE ANALYSIS SUPERBOWL.**

It's easy. Contact your local Brevant® seeds ag retailer to select the products right for your farm. Submit the sample. Then, forage experts will test your sample for visual appearance, forage analysis and milk per ton. And, if you place in the top five in any category, you'll win part of the \$25,000 prize pool.

## **WE'VE CHANGED EVERYTHING. EXCEPT OUR WORLD CLASS SILAGE.**

- Industry leading fiber digestibility.
- Increased dry matter intake.
- Greater income over feed costs (IOFC) and profitability. High forage diets are more economical, providing greater IOFC which is important in times of market volatility.
- Brevant® Unified and BMR corn silage hybrids are the dairyman's foundation for high forage diets.
- High quality forages contribute significantly greater nutrition per unit than average or lower quality forages.
- For producers that prefer flexibility at harvest, Forage Quality products are designed to be a first choice silage or a first choice grain product.
