

# HIGH-PERFORMANCE TOOLS FOR HIGH-PERFORMANCE PRODUCTS.

## BREVANT® SEEDS PLANTABILITY TOOLS FOR 2022.

### PLANT WITH CONFIDENCE THIS YEAR.

Get the most out of high-performance Brevant® brand products with these tools. The Brevant seeds application features two tools to aid planting. Available on IOS and Android platforms, the Brevant seeds app offers plantability and planting rate tools. Retailers can use the app to recommend planter setting by batch, make seeding rate recommendations and better position Brevant brand products.

### DOWNLOAD THE APP

Available for use on IOS and Android platforms. Search for Brevant seeds on the Apple Store and Google Play. Download, use and rate the app.

## PLANTABILITY TOOL

The plantability tool provides specific planter settings by a batch identifier that is found on the seed tag. Matching the type of planter to the hybrid's batch number is an important step you can take to optimize seeding rate and set yourself up for a successful harvest.

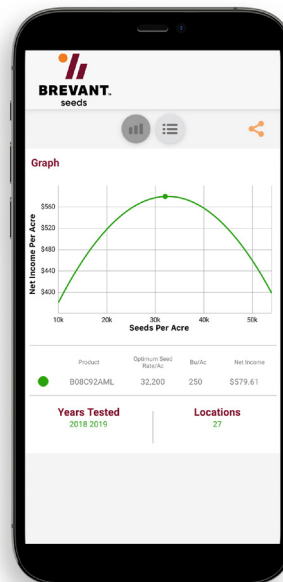

By entering the batch number from the bag tag or box to retrieve planting settings, you are taking advantage of the data and expertise that Corteva Agriscience has collected on these products.

## PLANTING RATE TOOL

The planting rate tool allows you to obtain an optimal economic seeding rate for your conditions by selecting your yield goal, seed cost and grain price. You can also enter multiple economic scenarios to assist you in selecting the seeding rate that best fits your needs. Consult with your Brevant seeds retailer for expert local advice on planting populations.
